

WoodsCan Hornet Rechargeable Electric Air Horn

The world's most advanced signaling device for personal, industrial, and recreational safety.

The WoodsCan Hornet is the next generation of air horn for both recreational and personal safety needs. A proven product used for over a decade in the rugged drilling & blasting industry where failure has severe consequences, the Hornet is the most reliable safety signaling air horn on the market today.

Recreational and personal uses include:

- Boating (Meets US Coast Guard requirements for boats up to 65 feet (20 m))
- Animal deterrent – harmless yet very effective (dogs, bears, raccoons, etc.)
- Sports (starting events like running races, soccer practice, surfing competitions, Golf tournament shotgun starts, motocross races, etc.)
- Personal safety alarm & emergency preparedness
- Lifeguards

Why choose the Hornet air horn?

- 121 decibels of warning sound for at least 15 minutes per charge, and it can be recharged 500 times
- Reliable: rechargeable lithium-ion battery operates in cold weather
- Safe: uses only air, no compressed gas and it can be carried on aircraft
- Cost Effective: save thousands of dollars vs. disposable gas air horns
- Go Green!: keeps thousands of disposable cans out of landfills and does not use refrigerant (a potent greenhouse gas)

Instructions

"We have approx. 300 field employees using the Hornet during peak season. These units are excellent. The sound is crisp, clear, and loud, and they provide the performance we need in our industry." - Joseph Aiello, Maine Drilling & Blasting
